## **Investor Fact Sheet**

Third quarter ended September 30, 2018

Stella-Jones Inc. (TSX: SJ) is a leading producer and marketer of pressure treated wood products. The Company supplies North America's railroad operators with railway ties and timbers, and the continent's electrical utilities and telecommunication companies with utility poles. Stella-Jones also manufactures and distributes residential lumber and accessories to retailers for outdoor applications, as well as industrial products for construction and marine applications. The Company's common shares are listed on the Toronto Stock Exchange.

## A Word from the President

Third quarter results demonstrated strong sales growth and continued improvement in operating margins on a sequential basis. Sales increased in all product categories driven by sales prices, market demand and acquisitions. While margins are up when compared to previous 2018 quarters, the pace of improvement was mitigated by the timing of customer price adjustments for higher untreated railway tie costs.

Looking forward, we are encouraged by the improving market conditions in the railway tie product category and the rising demand for utility poles. Given current market conditions and the recent decrease in residential lumber prices, we are on track to improve our operating margins in 2019. As always, we will continue to remain focused on optimizing our operations across the organization while diligently seeking market opportunities in all product categories.

## Outlook

For 2018, based on current market conditions and assuming stable currencies, Management expects higher year-over-year overall sales for Stella-Jones driven by pricing as well as increased market reach for the residential lumber and the utility pole product categories. Operating margins are improving thus far in the second half of 2018 when compared to the first half of the year. However, the progression of operating margins in the fourth quarter of 2018 will continue to be impacted by higher untreated railway tie costs until sales prices can be adjusted. The Company plans on spending up to \$45.0 million on property, plant and equipment in 2018, driven by capacity enhancement projects and its overall effective tax rate is expected to be approximately 27.0%.

For 2019, based on current market conditions and assuming stable currencies, Management expects higher year-over-year overall sales for Stella-Jones, driven by stronger pricing in some product categories as well as increased market reach for utility poles and residential lumber. Operating margins are expected to improve over 2018, primarily driven by increased pricing for railway ties and higher volume and improved product mix for utility poles. For details per product category please refer to the Management's Discussion and Analysis for the quarter.
