\* Plus applicable margin based on pricing grid included in the revolving credit agreements.

\*\* Plus set margin of 1.725%.

In March 2023, the Company amended its interest rate swap agreements and replaced its LIBOR interest derivatives used in cash flow hedging relationships with economically equivalent interest derivatives referencing SOFR. Prior to the transition from LIBOR to SOFR, the fixed swap rate was 0.872% and 1.125% plus applicable margin for the revolving credit facilities and the term loan facility, respectively.

The Company designates its interest rate swap agreements as cash flow hedges of the underlying debt. The cash flow hedge documentation allows the Company to substitute the underlying debt as long as the hedge effectiveness is demonstrated. As at June 30, 2023, all cash flow hedges were effective.

As at June 30, 2023, the fair value of interest swap agreements was \$28 million, recognized as non-current assets in the condensed interim consolidated statement of financial position (December 31, 2022 - \$29 million in the consolidated statement of financial position).

The fair value of these financial instruments has been estimated using the discounted future cash flow method and has been classified as Level 2 in the fair value hierarchy as per IFRS 7, *Financial Instruments: Disclosures*, as it is based mainly on observable market data, namely government bond yields and interest rates. A description of each level of the hierarchy is as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for these assets or liabilities, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

Financial instruments which are not measured at fair value on the statement of financial position are represented by accounts receivable, accounts payable and accrued liabilities and long-term debt. The fair values of accounts receivable and accounts payable and accrued liabilities approximate their carrying values due to their short-term nature. The long-term debt has a carrying value of \$1,139 million (December 31, 2022 – \$941 million) and a fair value of \$1,111 million (December 31, 2022 – \$908 million).
